

Do the best from the beginning

In year 1999, we were approved by EU TÜV standard to enter the European market as well as a committed manufacturer under the ISO9001 certification. By the year 2002, we have registered patent (NO.156413) as well as patents in both USA and China for our own "Movement design" & "Diaphragm system". Hence then we have started to customise design both mechanical and electrical measuring instruments.

We are persistent in our belief for:

1. The Most Reasonable Price
2. The Shortest Delivery Duration
3. The First-Class Service.

We are looking forward to fulfill your every expectation and the soonest service upon your request.
